Synth Universe – Volume 2:

„Mystic Spheres"

Produced by Peter Krischker and Frank „Xenox" Neumann
May 2007

featured by Yamaha Music Central Europe GmbH

http://www.easysounds.de/

vertrieb@easysounds.de

„Mystic Spheres" – the ultimative ambient & electronic set!

„Synth Universe" offers an universe of synthesizer sounds.
Several volumes will include all important synth-categories time after time.
This second volume „Mystic Spheres" offers atmospherics, motion pads, Fx-sounds and soundeffects, spacious synthleads, trance-sounds, vocal pads and analog vintage sounds. Mystic Spheres is indispensable for all user, who don't like to get only bread & butter sounds. The set is predestined for all kinds of Electronic Music, Trance, Ambient, Chill Out, and Soundtracks.

The MOTIF ES / XS-versions include about 60 MB new user waveforms.
Opposite to many other sample-based synthbanks you will not find completely sampled presets of popular synths.
Instead there are complexe waveforms compareable with preset waves, which are a great base for making new synthsounds using the soundengine of the MOTIF ES.

But also the MO6 / MO8 / S90 ES and MOTIF-RACK ES versions, which cannot use additional samples, are offerering a new kind of sound, which differs clearly from previous Motif sounds.

The MOTIF XS-version includes also programming of special XS-Features like Assignable Functions („XA-Mode"), new Arpeggio-types, new Effect-types and new Synth-Waveforms.
Totally 50 of 128 voices are a new type „Xpanded Articulation Synth Voices", signed with „AF1&2" at the end of the voice-name. These voices are allowing a maximum of sound flexibility. Using the Assignable Functions (AF1 + AF2) additional to basic sound two alternate element-combinations can be called. The crossing of the sounds is not abruptly, because the release of the elements is fading out when switching AF1 or AF2.
Additional each Xpanded Articulution Synth Voice includes an assignment of 5 Control Arps (ARP 1 – 5), which cause modulations of amp, filter, pitch or MIDI Gates. And of course you can use also the standard modulation sources like Modulation Wheel, Pitch Bend, Ribbon Control, Slider und Knobs.

The set „Mystic Spheres"" includes

- 128 new User-Voices (all versions)
- 30 Demo-sequences – Format: Standard MIDI File (all versions)
- 60 MB new Synth Waveforms (only MOTIF XS / MOTIF ES)
- 16 Performances (only MOTIF XS / MOTIF ES)

Important note for MOTIF XS / MOTIF ES-user:

For loading samples **Installation of optional DIMMs** (2 x 64 MB or more) is needed**.**
But you can load alternate version without samples, if you have not DIMMs installed yet.

Loading MOTIF XS Files

In folder „MOTIF XS" you find following files:

Mystic Spheres XS.X0A (All-File)	– *version including samples*
Mystic Spheres MO.X0A (All-File)	– *version without samples*
Factory Content.X0A (All-File)	

If you received the set with download or CD-ROM you have to copy this files to USB-device before loading to MOTIF XS.

After that you can load data using file-Type „All" to MOTIF XS.
New Voices will be loaded always to Voice Bank USER1.

You can also load single voices using file-type „Voice" or single performances using file-type „Performance".

Important notes:

With loading ALL-files all user data of Motif XS will be overwritten (User Voices, Performances, Master, User Arpeggios, Songs, Pattern, Waveforms, Utility-Settings).
Please save your data before loading files.
You can recall Factory Voices with Factory Set (UTILITY JOB).
Alternately you can load single voices or single performances from file „Factory Content.X0A"

For loading samples installation of optional DIMMs (2 x 64 MB or more) is needed.
But you can load alternate version „Mystic Spheres MO.X0A" without samples, if you have no DIMMs installed yet.

Loading MOTIF ES files

In folder „MOTIF ES" you will find following files:

MYSTC_ES.W7A (All-File)
MYSTC_ES.W8A

MYSTC_MO.W8V (AllVoice-File)
MYSTC_MO.W7V

If you received the set with download or CD-ROM you have to copy this files to Smart Media Card (size at least 64 MB) or USB-device before loading to MOTIF ES.
If you have connected USB CD-ROM drive to MOTIF ES you can load files directly from CD-ROM.

With loading ALL-files all user data of Motif ES will be overwritten (User Voices, Performances, Master, User Arpeggios, Songs, Pattern, Waveforms, Utility-Settings).
Please save your data before loading files.
You can recall Factory Voices with Factory Set (UTILITY JOB).

You can load single voices using **File-Type „Voice"**.

Here you find a short description of above listed files:

MYSTC_ES
This is the „Full Version" of the set. Here you find new User Voices, Waveforms and Samples. It must be loaded using file type **„All".**
Installation of optional DIMMs (2 x 64 MB or more) is needed**.**
For loading from Smart Media Card or USB-device size of 64 MB at least is needed.

MYSTC_MO
This version includes new Voices without samples.
It is compatible with MO6 / 7 / 8, S90 ES, MOTIF-RACK ES versions.
The set includes 128 User Voices and must beloaded with file-Type **„AllVoice".**
DIMMs are not needed.

New Voices will be loaded always to Voice Bank USER1.

Loading voices to S90 ES

Voices can be loaded directly from USB-Device to S90 ES or transmitted with S90 ES Voice Editor.
In folder „S90_ES" you find following files, which include same 128 Voices (User Voice Bank 1):

MYSTC_90.W7V (AllVoice-File)
MYSTC_90.W8V

MYSTC_90.S7E (Voice Editor-File)

If you received the set with DOWNLOAD or CD-ROM you have to copy above listed files to USB-device before loading to S90 ES. Then connect USB-Device with S90 ES and load set with FILE – LOAD – Type **AllVoice**.
With loading AllVoice-file user voices will be overwritten. Please save your data before loading files. You can recall Factory Voices with Factory Set (UTILITY JOB).
You can load single voices using file-Type **„Voice"**.
New Voices will be loaded to Voice Bank USER1.

Alternately you can transmit the voicebank using the **Voice Editor** from computer (Windows-PC or Mac OS X) to S90 ES. Please load file „MYSTC_90.W7E" to S90 ES Voice Editor.

Loading voices to MO6 / MO8

Voices can be loaded directly from USB-Device to MO or transmitted with MO Voice Editor.
In folder „MO6_MO8" you find following files, which include same 128 Voices (User Voice Bank 1):

MYSTC_MO.W7V (AllVoice-File)
MYSTC_MO.W8V

MYSTC_MO.W7E (Voice Editor-File)

If you received set with DOWNLOAD or CD-ROM you have to copy above listed files to USB-device before loading to MO. Then connect USB-Device with MO and load set with FILE – LOAD – **Type AllVoice**.
With loading AllVoice-file user voices will be overwritten. Please save your data before loading files. You can recall Factory Voices with Factory Set (UTILITY JOB).
You can load single voices using **File-Type „Voice"**.
New Voices will be loaded to Voice Bank USER1.

Alternately you can transmit the voicebank using the **Voice Editor** from computer (Windows-PC or Mac OS X) to MO. Please load file „MYSTC_MO.W7E" MO Voice Editor.

Loading Voices to MOTIF-RACK ES

Transmitting voices will be done using MOTIF-RACK ES Voice Editor.
Voices of USER Voicebank will be overwritten. Please save your own voices before transmitting.

Factory Voices can be restored with Factory Set (UTILITY JOB).

Steps for transmitting voices:

1. Load MOTIF-RACK Voice Editor
2. Voice Editor Setup: Select MIDI OUT Port.
3. Load Voice Editor File "MYSTC_MR.w9e" from folder „MOTIF-RACK ES"
4. Select „Setup – Transmit Voice Bulk – Normal User 1".
5. Press START. New voices will be sent to User Voice Bank 1 now.
6. After displaying „Transmit completed sucessfully" in editor please wait for disappearing „Receive MIDI bulk" in MOTIF-RACK ES display.
7. After transmission you will still see the voice which was selected before. Only after selecting next voice you will see the new voices.

Demo-sequences (Standard MIDI Files)

In the folder „SMF" you will find 30 sequences in „Standard MIDI File" format (SMF).
You can import this sequences to nay sequencer and use them for your own productions.
Most MP3-demos for this product on www.easysounds.de were produced based on this sequences.

Ou can recognize the Voice-Numbers by the file-names.
