vertrieb@easysounds.de

About „Dance Xpanded“

"Dance Xpanded " is the ultimate set for Dance, Trance, Electronic, Chill and Pop. It was produced by Peter Krischker. The sound designer and DJ JahnsPierre Leyton ("DJ Maverick") was engaged as Co-programmer in a separately marked part of the Voices ("JL").

„Dance Xpanded“ for Motif 6, 7, 8 includes:

- 128 Voices
- 4 MB new Synth Waveforms
- 100 MIDI-Loops / Arpeggios
- 64 Drumloops (WAV-Format)

Main focus of 128 Voices are Atmospheres, Pads, Synthleads, Synthbasses, Chordsynths, Gated Pads and Sequencer/Arpeggio sounds.

Special Features:

- Top-Analog Sound by professional programming and using new synthwaves
- „SawPhase“-Oscillators: 4 Sawtooth-Wave multisamples using different start-phases for getting analog attacks.
- Trance Gate Pads generated with User LFO
- Massive application of different filter types (LPF, HPF, BPF, BEF, Combi filter).
- Filter Control with modulation wheel or foot control

MIDI Loops

100 MIDI loops beside 128 new User-Voices are offered as Standard MIDI files. These arpeggios, sequences and chordgrooves are descended from the CD-ROM "Mega Arpeggio" and are suited very well for controlling the sounds of „Dance Xpanded“.

Drumloops

For building small arrangements or sound combinations 64 well-chosen Drumloops (WAV-format) from the EASY SOUNDS CD-ROM "Mega Loopz" were added to this set. They can be loaded with an external Audio-Sequencer or directly to Motif (Tye „Waveform“).

Laden der Voices

Die 128 Voices and 4 MB Samples can be loaded after selecting **File-Type „All“** with file **"DANCE_XT"** completely from Smart Media Card. Voices will be loaded to User Voice Bank.

With loading above listed files all user data of Motif will be overwritten (User Voices, Performances, Master, User Arpeggios, Songs, Pattern, Waveforms, Utility-Settings).

Please save your data before loading files.

You can recall Factory Voices with Factory Set (UTILITY JOB).

If you received set with download or CD-ROM you have to copy files „Dance_XT.W2A“ and „Dance_XT.W3A“ to Smart Media Card before loading to Motif. If you have connected SCSI CD-ROM drive to Motif you can load files directly from CD-ROM.

You can load single voices using **File-Type „Voice“** including samples.

Alternately to file "DANCE_XT" you can also load All-File **„DANCE_OS“**.

This set includes no samples.

This version is compatible with Motif-Rack.

You can transmit this set also using **Motif 6 / 7 / 8 Voice Editor**.

Please load file „DANCE_VE“.

Laden der MIDI-Loops

You find the MIDI-Loops in folder „Dance Xpanded Loops / MIDI Loops SMF0“.

Loops can be loaded or imported as Standard MIDI Files with every sequenzer.

MIDI loops are planned for controlling arpeggio sounds of the set.

Of course the allocation of MIDI loops to the voices is your choice. Nevertheless, in the following you receive some tips which voices fit best of all to the single groups of the MIDI loops.
