MONTAGE / MODX „DX7 Complete Collection“ (Library)

The Content of „DX7 Complete Collection“ is a compilation of the following DX7 sound banks:

- DX7 Factory Voices (8 Banks à 32 DX7 Voices)
- Best DX Collection (10 Banks à 32 DX7 Voices)
- DX7 Super Collection (9 Banks à 32 DX7 Voices)

The sound banks are created using the Yamaha FM Converter and stored into two Library Files.

https://yamahasynth.com/index.php?option=com_content&view=article&id=111&Itemid=937

Please refer to the content lists that are provided on the following pages.

Important Information:

THIS IS NOT A NATIVE MONTAGE OR MODX LIBRARY!

All the previous DX7 voices have been just converted to MONTAGE / MODX format and provided as Library Files. They have not been edited with any of the MONTAGE / MODX sound engine's features like effects, Motion Control Synthesis engine and so on. The converted Single Part Performance haven't even been categorized.

128 former voices from this Complete Collection are also available as a part of the free promotional download „MONTAGE Expanded“ which is available on yamahamusicsoft.com.

<https://eu.yamahamusicsoft.com/synth/montage-expanded>

Please note that this is particular overlapping content between this collection and MONTAGE Expanded.

How to load the sound library into MONTAGE / MODX

The soundlibrary can be just loaded as Library File (.X7L / .X8L) into MONTAGE or MODX. The content of both files is identical. Please un-zip them first and then copy them to a USB flash drive to load the content into the instrument.

! This sound library requires operating system OS v3.0 (MONTAGE) and OS v2.5 (MODX) or higher. Updates are available using the following link:

[Yamaha MONTAGE Downloads](#)

[Yamaha MODX Downloads](#)

Important NOTE:

When loading a **Library File** a new LIBRARY will be added. No available User data will be overwritten. The next empty library of the eight available **LIBRARY's 1 - 8** will be used. Since this is based on FM-X only, no Flash Memory will be occupied.

Library Performances can be edited, but not stored to the library. The edited Performances must be always stored as User Performance.

Loading the Library File:

- Copy the file „DX7Complete...” (.X7L / .X8L) to a USB flash drive
- Connect the USB flash drive to USB TO DEVICE to your instrument
- Press [UTILITY] and select „Contents > Load“
- Select the Content Type „Library File“
- Choose the file „DX7Complete...” (.X7L / .X8L)
- The display shows „Now Loading“

After loading you can select the Library Performances this way:

- Press [CATEGORY SEARCH]
- Select the Bank „DX7Complete...” on top of the display below „Bank/Favorite“
- Select Main Category „All“ or „No Assign“. All of the new Performances can be selected in the original order (see Performance List).

Deleting Libraries

- Press [UTILITY] and select Contents > Data Utility > Library.
- Tap on the Library you want to delete.
- Tap on „Delete“.
- Confirm with „Delete > Yes“.
