"Stage & Studio"

"Stage & Studio" includes the most important standard instruments and synthsounds, which are useful for live-music, pop-productions and entertainment.

Playability and suitability of the voices was tested by several live-musicians and prepared for perfect live- and studio usability.

Most voices are new programmed. Some standard-instruments are optimized versions of preset-voices.

Some voices like string ensembles, brass sections or string/bell/synth-combinations include complex layer-sounds, which are found normally in performance mode. This allows very easy making of individual Live-performances by user.

Voices doesn't include user waveforms or samples. Installation of optional DIMMs is not needed.

Overview of voice types:

- > Keyboards (Acoustic Piano, Electric Piano)
- > Bells
- > Organ
- > Bass
- Guitar
- > Strings
- > Brass
- > Reed
- Synth Leads
