MOTIF "Phat Analog"

This is the content of PHAT ANALOG:

- 128 Voices (all versions)
- 32 Performances (MOTIF XS, MOTIF-RACK XS, S90 XS / S70 XS)
- 32 User-Waveforms / 120 MB Samples (MOTIF XS, MOTIF ES)

"Phat Analog" is a timeless Voice- and Sample Library including an emulation of the legendary Minimoog (Leadsynth) and Jupiter 8 (Pads & Arpeggiosounds). Additional you will find many other sample-based analog synthsounds.

This product is the ultimative Analog-Extension for your MOTIF synthesizer!

A main emphasis are typical Minimoog synthleads. But also other spectacular synthleads like sync-lead (oscillator sync) or distorted leads with similar sound like Jan Hammer or Jordan Rudess are highlights of the product.

Further there are many synths of the categories synthbass, synthstrings, synthpads, synthbass, sequencer and noise soundeffects.

The Samples were produced mainly with the famous synths Minimoog and Jupiter 8 ("JP-8").

For musical reference recordings of musicians or bands like Pink Floyd, Manfred Mann (Earth Band), Camel, Lake, Tangerine Dream, Jean Michel Jarre, Jordan Rudess (Dream Theather, Liquid Tension Experiment), Jan Hammer, Steve Winwood and many other were used.

The voices are playable highly dynamic using velocity, modulation wheel, knobs, ribbon control and assignable functions.

The *effects* of the voices are very different – sometimes very spacious, sometimes absolutely dry for getting real vintage sound.

You can set the effect depth very quickly using ASSIGN 1 (Reverb) und ASSIGN 2 (Delay).

The *vibrato* of the synthleads can be controlled with the modulation wheel and sometimes additional with aftertouch. In the XS Performances FC1 und FC2 are routed to control #001 (modulation wheel) for controlling vibrato with foot control. This might be helpful if you need both hands for playing in case of split performances.

The ribbon controller is assigned many times to parameters filter attack or portamento time.

Using the Assignabe Functions (AF1&2) of the XS-series you can select alternate sound settings.

The 32 split-performances for the XS-series are using the left manual for accompaniment (drums, bass, pad/arpeggio) and the right manual for the synthlead-part.

Different from the voices the performances are not only using analog synthsounds but also combinations with other instruments for getting a big variety of sounds and styles.

The 8 performances named "New*..." are modified MOTIF XS Factory Performances.

Transmitting Voices to MOTIF-RACK ES

Transmitting voices will be done using MOTIF-RACK ES Voice Editor. Voices of USER Voicebank 1 will be overwritten. Please save your own voices before transmitting. Factory Voices can be restored with Factory Set (UTILITY JOB).

Steps for transmitting voices:

- Voice Editor Setup: Select MIDI OUT Port.
- Load Voice Editor File "PhatAnalog.w9e".
- Select "Setup Transmit Voice Bulk Normal User 1".
- Press START. New voices will be sent to User Voice Bank 1 now.
- After displaying "Transmit completed successfully" in editor please wait for disappearing "Receive MIDI bulk" in MOTIF-RACK ES display.
- After transmission you will still see the voice which was selected before. Only after selecting next voice you will see the new voices.

Transmitting Voices to MOTIF-RACK XS

For loading the voicebank the YAMAHA Studio Manager and the MOTIF-RACK XS Editor are needed. For the data-transmission between PC and MOTIF-RACK XS an USB MIDI connection is used, which needs a YAMAHA USB-MIDI Driver.

If you have not installed this software yet, you can download the files using this link:

http://www.yamahasynth.com/download/motif-rack_xs.html

After successful software-installation you can use the Studio Manager as stand alone application or integrated to Cubase. The MOTIF-RACK XS Editor will be started using the Studio Manager as host-application.

Before loading the editors the required MIDI Ports 1 + 4 of MOTIF-RACK XS must be activated. This will be done in the setup (preferences) of the Studio Managers (stand alone) or in the Cubase device-configuration.

Here you find the complete steps for transmitting voices. Some of the stept might be not needed, if you have used the Studio Manager and editor before.

- First make an USB-cable connection between your computer (PC / Mac) and the MOTIF-RACK XS (TO HOST) and switch the MOTIF-RACK XS to USB (> UTILITY – MIDI – MIDI In/Out..). This is the default setting.
- Start the Studio Manager. Open the setup and add the MOTIF-RACK XS as device (Add > Workspace).

 Select the MIDI Ports 1, 3, 4 (Inputs) and 1 + 4 (Outputs) of MOTIF-RACK XS in the MIDI Settings. The Input Port 3 will be needed, if you want to control the MOTIF-RACK XS from an external keyboard connected to the MIDI IN. In this case you have to set additional MIDI Thru to YAMAHA MOTIF-R XS Port 3 -> YAMAHA MOTIF-R XS Port 1.

 Click on "Start". You will see "Synchronizing…" in the Auto sync window. The MOTIF-RACK XS will switch to VOICE-Mode automatically. The display shows "Now receiving MIDI bulk data".

After successful transmission you can open the VOICE-Library with double-clicking to the Voice "Sync Power AF1&2". Select the "Bank" option instead of "Category". After that you can select the new loaded voices from the directory "Normal User 1".

Transmitting Multis to MOTIF-RACK XS

Beside 128 voices the soundset includes 32 Multis, which are corresponding to the performances of the MOTIF XS version of "Phat Analog".

The transmission of the multis to the MOTIF-RACK XS will be done with the editor. Please note that it is only possible to transmit single multis with the editor.

Open a file of the folder "MOTIF-RACK XS_PhatAnalog/Multis".

Then select type "Current" (Auto Sync Setting), which allows transmitting single multis.

Press "Start" for sending the data to the edit buffer of MOTIF-RACK XS.
