This voice set is provided in Standard MIDI File format for DX7-User. You can transmit the data to DX7 using a DAW like Cubase, Logic, Sonar or a stand-alone MIDI file player.

FM7 user are able to load voices using both formats; SYX and FM7.
The „f7a" files must be loaded with the command „LOAD". Each file contains 4 DX7 banks.
Using IMPORT SYSEX single DX7 voice banks including 32 voices each can be loaded using the „SYX" format.
